

# Financial Problems faced by Students

Made by :Julien Rolland, Maxime Jauroyon, Philippe Massouf

# What ?

- Grid of character icons representing individual data lines.
- Color-coded of well-being.
- Instant visual assessment of group well-being.

# Who ?

- Tailored for college students analyzing data.

# Why is it important?

- Critical for recognizing societal well-being trends.
- Identifies areas needing policy attention or change.
- Relates socio-economic factors to student life and choices.

# Project Description

# Motivation

**Financial problems** faced by students ( high tuition fees, cost of textbooks and supplies, living expenses ) **lead to student loans and debt accumulation.**

These challenges can **impact their academic performance and overall well-being.** It can also prevent some students to pursue their studies or force them to **drop out.**

Investing in the well-being of students today would ensures a more skilled and resilient workforce for the future, contributing to **overall societal progress.**

# Target audience

- Provide interactive ways of understanding the well-being of the U.S. student population.
- Any College students

# Research question

How does the amount and type of student loan debt acquired by university graduates affect their methods of repaying this debt and their financial stability in terms of savings, investments, and overall economic self-reported well-being in the future?

# Data Source

- Survey of Household Economics and Decisionmaking (SHED) from the Federal Reserve (FED), central bank of the U.S.
- Collected online by Ipsos, multinational market research company in Paris
